

## SEASONING APPLICATOR

高级流量控制调味系统

### ADVANCED FLOW CONTROL

This innovative seasoning applicator solves the persistent challenge of sticky, clumping seasonings with patent-pending agitation technology. Engineered for consistent, uninterrupted flow, this system ensures precise seasoning delivery.

创新的调味品撒粉机，通过专利搅拌技术解决了粘性、结块调味粉的流动难题。系统专为持续稳定的物流设计，确保在高产量环境下精准输送。

### AGITATION TECHNOLOGY / 专利搅拌技术

#### Anti-Bridging Paddles

防架桥拨片

Proprietary mechanism prevents bridging and clumping of sticky, difficult-to-flow seasonings.

#### Continuous Flow

持续均匀流动

Maintains steady seasoning feed without clogging or interruption during high-volume production.

#### Challenging Materials

处理挑战性物料

Effectively manages hygroscopic powders and oil-based seasonings that typically cause problems.

### OPERATIONAL EFFICIENCY / 运行效率

#### Quick Changeover / 快速换产

Removable feeding components enable fast, tool-free disassembly for rapid product transitions.

#### Easy Cleaning / 易于清洁

Modular design supports thorough sanitation between batches to maintain food safety standards.

#### Minimal Downtime / 减少停机时间

Simple component removal reduces changeover time and maximizes production uptime.

### PRECISION CONTROL / 精确控制

#### 22-Liter Hopper / 22升大容量料斗

Generous volume reduces refill frequency during long production runs.

#### Adjustable Flow Rate / 流量可调节

Variable delivery up to 2.5L/min allows precise control over seasoning application.

#### Energy Efficient / 高效节能

Low 25W power consumption minimizes overall operating costs.

PARAMETER / 参数	SPECIFICATION / 规格
Hopper Volume / 料斗容量	22 Liters
Maximum Flow Rate / 最大流量	2.5 L/min
Power Consumption / 功耗	25W
Agitation System / 搅拌系统	Patent-pending anti-bridging paddles
Component Design / 结构设计	Modular, tool-free removal

## IDEAL APPLICATIONS / 理想应用场景

POTATO CHIPS / 薯片

OATMEAL / 燕麦片

POPCORN / 爆米花

NUTS / 坚果

### BEIJING WINTEC MACHINERY

Engineered for Excellence. Wintec provides high-quality food processing machinery for the global market.
